

Exercise 12 - High Frequency Granger Causality Analysis (in R)

Jan 7, 2018

Figure 1 - Normalised cryptocurrency price in USD (30 days)

Figure 2 - Normalised cryptocurrency price in USD (16 hours)

Data collected via script: 600MiB, 1000s features (Poloniex)
Data collected via scraping: 1 Year, 7 currencies (CoinMarketCap)

Figure 3 - Normalised cryptocurrency price in USD (365 days)

Figure 4 - Cryptocurrency binary price change (last 30 days)
